

Investor Report Project Oasis

Capitalization Framework & Analysis

Capital Raising & Fund Allocation

The Ask

The \$1M raise is designed to transition Project Oasis4 from early-stage setup to live, revenue-generating operations across initial markets.

Sources of Funds – FY 2026	Amount
Bridge Debt	300,000
Series A	1,000,000
Series B	3,000,000
Total Capital to be Raised	4,300,000

Funds Allocation	Amount
Opex Clearance	250,000
Platform Development (CapEx)	1,000,000
Market Launch - 3 Countries (Year 1 Opex)	3,000,000
Total Initial Deployment	4,250,000
Remaining Capital (Buffer)	50,000

Where exactly does my money go?

Bridge Debt: \$300,000 Short-term debt to fund immediate operations before equity rounds close. It is not equity it is repayable debt that provides runway while fundraising is in progress. Settlement of outstanding operating expenses to stabilize the business and clean up the balance sheet.

Series A: \$1,000,000 First equity round at \$11M pre-money. This is the foundational raise that establishes the company's equity structure and brings in the first institutional investors. Investment towards technology and platform buildout, including product infrastructure

Series B: \$3,000,000 Second equity round, the largest of the initial raise. Funding the go-live in 3 target countries initial market entry costs and opex.

Is the raise amount justified by what you plan to do with it?

Total: \$4,300,000. This is not an arbitrary number it is the sum of what the business needs to get from pre-revenue to live operations in 3 countries within FY2026.

Funding and Ownership Overview

FUNDING VALUATION PROGRESSION

Valuation Progression

A 1.25x step-up in valuation is applied between rounds, reflecting expected operational progress and scaling milestones. This approach aligns with standard venture financing dynamics while maintaining a disciplined growth trajectory.

OWNERSHIP SUMMARY (Post Series D)

Investment Structure & Capital Plan

INVESTMENT JOURNEY

	Series A FY2026	\$1.0M Total Raise	654,545 Warrants	\$11.00 Price / Share
	Series B FY2026	\$3.0M Total Raise	0 Warrants	\$12.90 Price / Share
	Series C FY2027	\$3.0M Total Raise	0 Warrants	\$12.90 Price / Share
	Series D FY2027	\$4.0M Total Raise	0 Warrants	\$13.80 Price / Share
TOTAL CAPITAL \$11.0M		Total Warrants Outstanding (Approx) 654,545 (Issued in Series A)		

Initial Pre Money Valuation

The initial pre-money valuation of the company was derived using a triangulation of three widely accepted valuation methodologies: the Discounted Cash Flow (DCF) method, the Guideline Public Company method, and the Private Comparable Transactions method. Given the early-stage nature of the company and the inherent uncertainty in long-term projections, equal weighting (33.3% each) was assigned to all three methodologies to balance intrinsic valuation with market-based benchmarks. This blended approach resulted in a concluded pre-money equity valuation of approximately \$11.0 million

Initial Capital Structure

The model begins with 1,000,000 shares outstanding, allocated as 90% to Founders and 10% to the Employee Stock Option Pool (ESOP). This establishes the pre-money baseline prior to external investment.

Funding Rounds (Series A)

The Series A round involves a \$1.0 million investment, structured as SAFE or Preferred Equity. Investors participate at an implied equity price of \$11.00 per share, with additional warrants at a 30% premium strike price, offering:

Benefits to Early Investor

Enhanced Upside Participation - Warrants provide leveraged exposure to future valuation growth beyond the initial entry price. Downside Protection via Structured Entry - SAFE / Preferred Equity offers priority positioning and flexible conversion terms in future rounds. Participation in Early-Stage Value Creation. Entry at an early stage enables investors to benefit from significant potential scale-up and market expansion. Alignment with Future Valuation Growth - Premium strike price ensures additional gains are realized upon successful execution and higher future valuations.

Cap Table Progression - Shareholder Ownership by Round

SHAREHOLDER OWNERSHIP

Ownership Tracking

A comprehensive ownership table tracks all shareholder classes across each round; detailing share counts and their evolution over time.

Founder Control Consideration

The capital structure Post Series A is designed to maintain meaningful Founder ownership while enabling strong investor participation across funding rounds: Following the Series A round, Founder ownership remains at approximately 51%, ensuring continued majority control during a critical stage of development. As subsequent rounds are executed, dilution is managed in a measured manner to preserve alignment between founders and investors. Series A investors (including equity and associated warrants) account for approximately 43% ownership on a fully diluted basis, providing significant participation in value creation while maintaining Founder-led execution and strategic continuity. An additional approximately 6% is reserved for an employee equity pool, designed to attract, retain, and incentivize key talent aligned with long-term growth objectives.

Shareholder Dilution Waterfall

OWNERSHIP COMPOSITION ACROSS ROUNDS

Shareholders	Series A	Series B	Series C	Series D
Founders	38.4%	6.2%	4.8%	4.7%
Employee Pool	4.3%	0.7%	0.5%	0.5%
Series A Investors (Equity)	(5.2%)	0.6%	0.5%	0.5%
Series A Warrants	(37.5%)	4.5%	3.5%	3.4%
Series B Investors (Equity)	—	(12.0%)	1.3%	1.2%
Series C Investors (Equity)	—	—	(10.5%)	1.2%
Series D Investors (Equity)	—	—	—	(11.6%)

Funding Rounds (Series A–D)

Four sequential funding rounds are structured using SAFE / Preferred Equity instruments. Each round is fully parameterized, incorporating pre-money valuation, price per share, new shares issued, and post-money valuation.

Dilution Analysis

The model includes both ownership percentage tracking and dilution analytics, providing visibility into:

- Ownership shifts by stakeholder group
- Incremental dilution per round
- Cumulative dilution across all rounds

ROUND-WISE DILUTION CONTRIBUTION

Thank- You
